September 2011 marks 25 years in unscramblers and feeders.

How do we celebrate it?

By adding yet another feeder type to our diverse line of versatile & proven systems.

We are excited to bring to you the amazing model **ZE Linear Feeder**.

Capable of ultra-high speeds and offering 100% orientation of many types of parts and components.

In this issue,

1. **ZE Feeder debut.** Its only spray nozzle caps at 2,000+ every minute! 100% orientation.
2. **Glass Ampules fed to labeler, quite gently.**
3. Medical Inhaler placed onto weigh scale.

ZE Feeder by RNA.

Brought to you by Palace. *Awesome!*

- Making its American debut in our booth at NPE 2012 (Orlando FL. April 1-5)
- Capable of mulity lane feeding of parts with 100% orientation for printing, inspecting, counting, batching, and assembling applications.
- Suitable for condiment packets, stir straws, caps, electrical components, medical devices, and much more.
- Compact and modular design with a versatile layout allows this system to be customized for many applications.
- Low-profile design for easy access & change overs.
- This video shows the multiple lane orientation for high rate total output and an optional rotary lane combiner for single lane output as same high rate.

Linear feeder from
RNA.wmv

Glass Ampules, filled & sealed, are

fed onto roller conveyor for wrap around label. 80 per minute.

- 3" tall by 3/4" diameter. We use our simple & very gentle centrifugal feeder to successfully orient and place ampules onto the roller conveyor.

→ Inhalers (Filled & pressurized) are fed after quarantine onto a weigh scale.

Once verified as either "good" or "bad", they are diverted accordingly.

[Forward to colleagues please.](#)
