TABLET HOPPERS

- Bin * Model TH-2.5 has 2.5 cu. ft
- * Model TH-6 has 6 cu. ft.

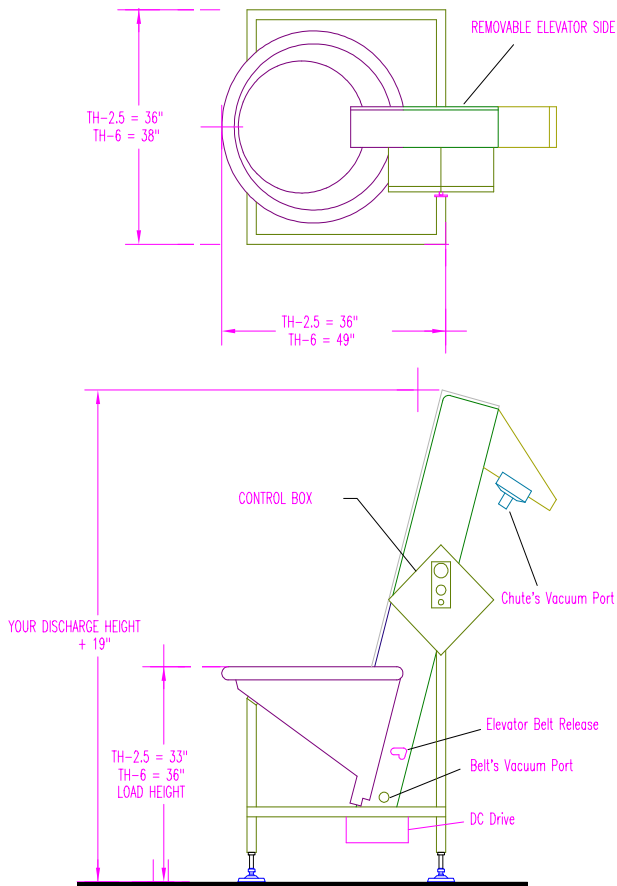

Either size is removable from the frame. This single stainless steel piece has sanitary welds and a mirror polish finish inside. Its unique round design has no corners to trap product.. A Lexan lift-off cover is included.

Larger capacity & custom bins are available.

Elevator & Belt Assembly has a lift-off Lexan cover. One elevator side is removable to allow for complete access and removal of the cleated belt. Catch pan at base of elevator is removable.

Transfer Chute has removable stainless cover and dust collection tray with vacuum port. Different types of chutes are available to allow for long feeds or wide feeds.

Drive Assembly is either under the base frame (TH-2.5) or completely below the bin and enclosed (TH-6). Variable speed DC drive or optional AC drive. Our receiving bin's level sensor controls the belt's movement.
